SUMMARY

I have participated in many large projects, especially in the field of e-commerce, accumulated a lot of valuable experience and have experience developing with the scrum model for more than 2 years.

Proficient in ReactJS and NextJS, capable of working independently and as part of a team, and quickly adaptable to different project types.

Currently expanding knowledge in Backend development, specifically focusing on NodeJS, to become a more well-rounded developer.

EXPERIENCE

2022 - Present

Ho Chi Minh City, Vietnam

Software Engineer

Kyanon Digital

KYANON

Kyanon Digital is a technology company that specializes in providing digital transformation solutions for businesses.

- I have been with the company for almost 3 years.
- From intern to someone who can do everything in different teams and projects.
- Ability to lead company interns
- Confident with your soft and hard skills
- Highlight your accomplishments, using numbers if possible.

PROJECTS

Amaze - CP GROUP

📅 2023 - Present 📍 Ho Chi Minh City, Vietnam

Description: As a large-scale e-commerce project, we take on the role of developing a website for sellers similar to Shopee Seller Center. And then we will embed our part into the customer's large system to complete an e-commerce system.

Role : Front end Development

Technical: ReactJS, Typescript, Vite, NX, Restful API

- Perform optimization to enhance user experience
- Developed the main modules of an e-commerce site such as (Authentication, Authorization, Product, Order, Marketing Centre...)
- Successfully brought the project to production for end users to use.
- Receive customer appreciation for the product and continue working on the next phases.
- Personally, I learned a lot of knowledge from the project including coding knowledge, business knowledge and how an order will work.
- Learn how to flexibly change how a sprint works
- On customer holidays they can run up to 10k campaigns.

Chan Brother Travel - Singapore

📅 2022 - 2023 📍 Ho Chi Minh City, Vietnam

Description: It is a project of the Singapore government on the topic of tourism. With the desire to develop a website to be able to book tickets, view tours and book hotels. Based on that, we have completed the website for customers and received many good reviews.

Role : Front end Development

Technical: NextJS, Typescript, Redux, Restful API

- Completed and put into production for customers and received many good reviews
- 3rd party library application to complete customer checkout process
- About myself I learned how to develop UI similar to figma and the flow of a travel website
- Increase customer return to your website with google analytics and google tag manager

PROJECTS

BIPBIP - Central Retail

📅 2022 - 2023 📍 Ho Chi Minh City, Vietnam

Description: It is an e-commerce project used to manage the quantity of goods, distribution of goods, delivery drivers, and other invoices and documents. Build 2 PWA with ionic

Role: Front end Development

Technical: ReactJS, NextJS, Ionic, Javascript, Typescript, Redux

- Used directly by customers at Big C (old) Go (new)
- Internal PWA received good reviews from internal shipping units reducing the cost of hiring other services such as Grab, Ahamove, Lalamove
- Help customers shorten shopping time at Big C and Go and they can track orders in real time
- Working according to the agile/scrum model, work will be refreshed at the beginning of each sprint for each member.

COURSES

Coursera Project Management

INTERESTS

I want to become a fullstack developer, besides that I also really like playing soccer, and playing LOL game, and sometimes when I have more time I like to travel to explore beautiful places of our country.
